

Safevent Security Fencing®

Introduction

For extra privacy, extra security and anti ligature and anti climb applications The safevent system has vandal and tamper-proof post fixings and is extremely strong. Anti-ligature, anti-contraband solid aluminium sheets perforated with 3mm holes using a privacy matrix are powder coated any Ral colour or can carry any artwork or printwork design, to offer stimulating environments.

Cloaking can be fixed to existing or new build fencing and erected to any height and matching flush fitting gates (no gaps for contraband or ligature) are available.

The system is impossible to climb, prevents the passing of contraband and is virtually impossible to cut using conventional hand tools. The fencing carries a 25 year guarantee.

Applications

Mental Healthcare. Education. General Healthcare. Commercial Buildings. Custodial/ Prison Facilities

Product Data

Heights 2.44m, 3.0m, 4.2m, 5.2m

Fence Panel Width 2515mm
